INSTALLING SOLAR IS AFFORDABLE, EASY, AND A GREAT INVESTMENT!

ARE YOU READY TO GO! SOLAR?

SOLARIZE YOUR HOME

THE BENEFITS OF GOING SOLAR

ENVIRONMENTAL

ECONOMIC

SOCIAL

+ **Reduce your greenhouse gas (GHG) emissions.**

+ **Reduce your utility bills.**

+ **Become energy independent.**

Produce more electricity than your home needs and watch your meter spin backwards!

+ **Increase your home's value.**

Set a higher asking price and sell your home faster.

+ **Conserve the environment.**

Lower your carbon footprint by replacing utility power with solar.

+ **Harness financial incentives.**

In addition to state, federal and local incentives, GO! Solar reduces total project cost by up to 20%!

+ **Foster a clean energy economy.**

Set an example for your neighbors and support businesses committed to sustainable electricity production.

Fun Fact

Solar works in the Northwest!

Consider this: Germany continues to install more new solar energy systems per capita than any other country in the world, yet its capital, Berlin, receives less sun than Astoria, Oregon.

SOLAR PAYS FOR ITSELF!

Typical 4kW single story system with Northwest-made solar panels and string inverter*

OREGON \$13,600
4kW installed system price

(Pacific Power customers)

\$2,800
cash incentives
at time of purchase

\$6,000
state tax credits taken
over 4 years

\$3,240
federal tax credit up to
30% of purchase price

\$1,560

total cost after
credits and incentives

3.9 years

payback period based on
\$400 annual savings

OREGON \$13,600
4kW installed system price

(Co-op or PUD customers)

\$6,000
state tax credits taken
over 4 years

\$4,080
federal tax credit up to
30% of purchase price

\$3,520

total cost after
credits and incentives

9 years

payback period based on
\$400 annual savings

WASHINGTON \$32,787
6.6kW installed system price

\$2,287
no sales tax

\$23,166
production incentive
over 5 years

\$9,150
federal tax credit up to
30% of purchase price

\$-1,816

total cost after
credits and incentives

4 years

payback period based on
\$700 annual savings

*Pricing is for a typical single story home with good solar exposure using Northwest-made solar panels and string inverters. Please note that every system is different! Our vetted contractors will assess your home for solar and give you the best system for your situation!
