Subject: NWP-2017-41 Clean Water Act 401 and 404 Public Comment

Dear Mr. Stine and Mr. Krug,

I strongly oppose the proposed Jordan Cove Liquefied Natural Gas and Pacific Connector Pipeline project (NWP-2017-41); it will significantly harm Oregon's rivers/streams and Coos Bay. I urge you to deny the Clean Water Act permits 401 and 404. Furthermore, the DEQ should hold public hearings in the 4 impacted counties: Coos, Douglas, Jackson, and Klamath.

Specifically, I am concerned that *an issue to address might be:*

- *Damming rivers and trenching rivers/streams*
- *Horizontal drilling; risk of frac-outs*
- *Removal of riparian zone – warmer water's effect on salmon*
- *Dredging 9 miles of wetlands*
- *Deterioration of drinking water quality*
- *Run off from access roadways*
- *Ongoing herbicide and fertilizer use along pipeline route*
- *Pipeline along steep terrain causing landslides*
- *Use of millions of gallons of our water to test pipeline*
- *Assault on the esthetics and wellbeing of places I fish or raft or clam*
- *Impacts on fishing and recreation sites*
- *Dredging Coos Bay*
- *Failure to consider proposed dredging for navigation channel*
- *Limiting traffic in the bay*
- *Tribal fishing rights not honored*
- *Skimpy plans for remediation*
- *Inadequate modeling of Tsunamic threat*
- *No assessment of earthquake risks*
- ***Contribution to climate change – and climate's effects on water quality***
